

FOR MOTORHOMES

Patriot™ Braking System

True proportional braking.

Strong As An Ox™

We're behind you all the way.

The Patriot from Blue Ox® gives you the comfort needed when you are braking your tow vehicle. Not only is it convenient and easy to store, but it also proportionally applies the brakes smoothly while you're slowing down to a stop, instead of suddenly jolting your tow vehicle causing costly damage to your brakes. **The Patriot even works with Hybrids!** All Blue Ox braking systems come with a one year warranty.

On the brake itself, there is an easy-to-read LED display, complete with one set up button, a break away plugin, manual adjustment for sensitivity, on/off switch and an auxiliary 12-volt connection.

In-coach controller complete with a manual brake lever, easy-to-read LED display and gain adjustment.

The Patriot works for your motorhome and tow car by safely bringing it to a smooth stop with proportional braking.

No more wires – Monitor all brake functions or manually apply brakes from the comfort of the driver’s seat through a wireless remote control that continuously communicates with the braking system.

No more power concerns – Built in battery ensures power is always available to the brake.

No more mess – By using an electric cylinder there are no air pumps, storage tanks or hoses; therefore there is no chance for leaking and greatly reduces power required.

Patent Pending.

Proportional, progressive, and much more!

- All electric! No pump, tank, or air hoses to leak
- No slamming of the brake, moves smoothly and proportionally
- Adjust the amount of braking from coach
- Manually apply brakes from coach with wireless remote
- Break away comes standard
- Electric actuator instead of air cylinder
- Built-in battery
- 15 lbs! Half the weight of similar braking systems
- LED display on both the brake and remote control
- Convenient carrying handle
- Comes standard with on/off switch
- Easy self-calibration with the push of one button
- Unique, easy to use brake pedal clamp
- Larger surface push pad on back of unit to seat
- Wrap around cleat on side for safe storage of plug wiring
